

ENVIRONMENTAL POLICY

Here in Clannlife Fitness we strive to adopt the Green Hospitality Charter. We are compliant with any requirements made by the Local Authority in respect of Environmental Management Legislation.

We engage in Data on Environmental Impacts – waste, water, energy/Co2 – to allow for environmental benchmarking on an annual basis

We monitor flows of water and operate a Waste Water Treatment plant to specified standards.

As part of Energy, Water and Waste Management Action Plan we keep our club as green as possible by using Recycling Bins all around our premises for all Recyclable waste. We have also eliminated plastic cups from our club and have reusable water bottles for sale. We continue to adapt awareness about improving the environment both within & outside our club.
